

BASIS Participates In Q1 Sun Solutions CD

In the first quarter of 2002, BASIS International was one of 40 distinguished companies to participate in the Sun Solutions CD. Each quarter, Sun produces this CD, which offers the latest in trial software or product demos. Sun distributed more than 100,000 copies of the CD, which were mailed to the Sun Customer database. It was also handed out to thousands of attendees at the JavaONE conference in San Francisco.

BASIS considers our participation in the Sun Solutions CD to be a good investment. It's an excellent way to get the BASIS name out. BASIS has spent several years creating a comprehensive development toolset that should be a viable candidate for any serious business application project.

Sun SOLUTIONSsite To Include BASIS's BBj

BASIS's BBj will be listed in the Q2 version of the SOLUTIONSsite catalogue. This is a Sun authorized web site where third-party products and services supporting the Sun environment are bought and sold.

This site is geared for those who work in the Sun™ Microsystems technology environment and those who develop products compatible with that environment.
