T echCon Europe 2003 features "real-life functionality" and presents the many choices for application deployment, which developers can use to enhance their applications and increase their return on investment.

As a TechCon Europe 2003 attendee you will.

- Hear how BASIS provides cross platform deployment options, such as Linux, for both GUI and CUI applications
- Witness live demonstrations of various ways of delivering BASIS solutions on the Web
- Experience first-hand what other developers are doing to enhance and extend the functionality of their applications
- Learn how to implement Web services with BASIS products
- Discover what you can do to increase your revenue
- Appreciate the value of the underlying Java technology of BBj
- Determine how you can get the most out of your application with the latest in BASIS technology
- Become familiar with the benefits of using the BASIS IDE, a modern software development tool, for developing new projects and maintaining older projects written in previous versions of the language
- See the latest features and functionality in (Visual) PRO/5® 4.02 and BBj 3.02
